### **DETAILED ACTION**

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 is drawn to a pharmaceutical composition comprising as an active ingredient a compound of claim 1 or 2, but fails to state what the compound is active against. Without setting forth that which the compound is active against, it is unclear what compounds would be used as an active ingredient.

Claim 5 is indefinite wherein the claim states that a target disease is a disease caused by excess uptake of various sugars. However, it is unclear what the target disease is referring to, as claim 3, the claim from which it depends, makes no mention to any disease or target thereof.

All claims which depend from an indefinite claim are also indefinite. *Ex parte Cordova, 10 U.S.P.Q. 2d 1949, 1952 (P.T.O. Bd. App. 1989).*

#### ***Allowable Subject Matter***

Claims 1-2 and 8-9 are allowed. The prior art is not seen to teach or fairly suggest the claimed compounds, specifically wherein the non-saccharide Q/T group is a S-, O-, or N-linked aryl group or an aliphatic or aromatic cyclic amino group. The closest art is seen to be US

7,217,697 (cited on 2/15/08 IDS as US 2004/0176308 and WO 02/98893), but this patent has cycloalkyl groups in the non-saccharide Q/T group, not those instantly claimed. It would not be obvious to a skilled artisan to modify the groups as done in the instant application.
